Small storage tank 5L under table TR3500TO 5 T energy efficiency class A, energy efficiency class spectrum A+ to F, material of the boiler plastic, material jacket plastic, volume of the container 5l, nominal power 2.2 kW, connection voltage 220 ... 240V, frequency 50 Hz, version under table, placement vertical, temperature limitation, max. permissible operating pressure 0bar, height 435mm, width 250mm, depth 450mm, cold drinking water connection external thread, nominal inside diameter cold drinking water 3/8 inch (10), hot water connection external thread, nominal inside diameter hot water connection 3/8 inch (10), protection class (IP) IP24, energy efficiency hot water 38%, tap profile XXS, small tank - highest energy efficiency combined with intelligent functions such as pressure and drip stop. Small tank, under-sink device, 5 liters, open (unpressurized), for supplying a tap. Drip stop: no dripping when heating up, none Waste of water, clean and environmentally conscious Pressure stop: Displays calcification and detects the wrong water connection from 0.25 MPa (2.5 bar) Quick and clean installation thanks to CLICKFIX plus® assembly technology The energy saver: Lowest standby energy consumption of just 0.18 kWh/d Single supply, washbasin, sink Danger! Application note: This item is a pressureless device (maximum permissible operating pressure = 0 bar). It can only be used with pressure-free fittings (low-pressure fittings). Please note the difference between high pressure and low pressure fittings. The high-pressure faucet mixes the water inside the faucet. The low-pressure fitting is connected to a water storage tank (boiler) and has 3 connections. When it heats up in the tank, the water expands, which can cause the faucet to drip. Application note This item is a pressureless device (maximum permissible operating pressure = 0 bar). It can only be used with pressure-free fittings (low-pressure fittings). Please note the difference between high pressure and low pressure fittings. The high pressure faucet mixes the water inside the faucet. The low-pressure fitting is connected to a water storage tank (boiler) and has 3 connections. When it heats up in the tank, the water expands, which can cause the faucet to drip. Application note This item is a pressureless device (maximum permissible operating pressure = 0 bar). It can only be used with pressure-free fittings (low-pressure fittings). Please note the difference between high pressure and low pressure fittings. The high pressure faucet mixes the water inside the faucet. The low-pressure fitting is connected to a water storage tank...

* Note on delivery time: Day = Monday to Friday, no public holiday in Bavaria or Saxony. Goods are also delivered on Saturdays (DHL).

** Payment methods may vary from country to country. All prices plus shipping and excluding customs duties or other additional costs (import sales tax) for deliveries outside the EU.

*** Savings compared to RRP = the manufacturer's recommended retail price. RRP is the price recommended to retailers by the manufacturer, importer or wholesaler as a resale price to the customer. The RRP is also referred to as the list price and is defined as the highest possible price that a buyer would pay for a specific product before any discounts (Source of gross list prices: Germany).
