Under the brand name SIRIUS ACT, Siemens offers a unique portfolio of commanding and signaling devices with global product approvals in four modern design series made of robust real metal and high-quality plastic. The innovative snap-on concept simplifies assembly to such an extent that only one hand and no special tools are required. Groove-free holes are sufficient as mounting holes, as 100% anti-twist protection is already integrated. Thanks to the consistently high degree of protection, the robust devices are suitable for industrial use and outdoor use. Even cleaning with a high-pressure jet is possible. Neither dust, oil nor aggressive alkalis can interfere with reliable operation. In addition to the standard wiring, the devices can also be connected to the controller via PROFINET, AS-Interface or IO-Link. This reduces your wiring effort, minimizes sources of error and gives you more flexibility. The graphic online configurator provides convenient support when selecting and ordering individual devices, housings and labels. Extensive documentation (e.g. manual, 3D data, connection diagram) is available. Available versions: various locking systems (Siemens, BKS, RONIS, OMR, IKON), 2/3 switching positions, latching/momentary actuation, various key withdrawal positions. Note: Please order individual devices, holders and modules separately. SIRIUS ACT - Performance in Action when commanding and reporting. Simply assembled, simply strong, simply perfect.
