Surge protection RJ45-SPD Class EA J00029A0116 Mounting type other, connection (information technology) RJ45, structured data cabling with RJ45 components are an important part of today's telecommunications. Their 100% availability is the prerequisite for smooth data transfer with data rates of up to 10 Gigabit Ethernet. However, there is an enormous risk potential for the connected active components due to galvanic, inductive and capacitive couplings as well as potential differences. This means that a suitable RJ45 surge arrester with potential equalization must be included in the data lines to protect the active components. The surge protection RJ45-SPD (Surge Protection Device), Class EA for data rates up to 10 Gigabit Ethernet and PoE/PoE+ applications is equipped with contact overbending protection, which also allows RJ11/RJ12 plugs to be inserted without damaging the contacts. Version: suitable for RJ45/11/12 plugs, surge protection RJ45-SPD Class EA (ISO/IEC)

YOUR ADVANTAGES

WORLDWIDE TRADE
Corporate video eibmarkt®

99% CUSTOMER SATISFACTION
> 500,000 customers worldwide

* Note on delivery time: Day = Monday to Friday, no public holiday in Bavaria or Saxony. Goods are also delivered on Saturdays (DHL).

** Payment methods may vary from country to country. All prices plus shipping and excluding customs duties or other additional costs (import sales tax) for deliveries outside the EU.

*** Savings compared to RRP = the manufacturer's recommended retail price. RRP is the price recommended to retailers by the manufacturer, importer or wholesaler as a resale price to the customer. The RRP is also referred to as the list price and is defined as the highest possible price that a buyer would pay for a specific product before any discounts (Source of gross list prices: Germany).
