Motor polarity reversing relay 2A MUR U1 (24V DC) rated operational current I_e 2 ... 2A, rated operational voltage U_e at DC 24 ... 24V, current measuring module, type of connection technology screw connection, rated control supply voltage U_s at DC 24 ... 24V, type of voltage for actuation DC, Number of analog inputs 2, number of outputs, contact-based 2, monostable switching function, design of electrical connection for auxiliary and control circuit screw connection, motor reversing relay, micro drives are increasingly being used in building automation. Such very compact drive systems usually work with DC motors and can therefore not be operated on the conventional controls designed for AC motors. The MUR U1 takes over the necessary conversion from AC control to DC drive, a polarity reversal logic is used to reverse the direction of travel, and an adjustable cut-off current in conjunction with the adjustable response time ensures a precisely adjustable and safe limit switch. , dimensions: 43x43x33mm, 24V DC, 10mA-2A

YOUR ADVANTAGES

WORLDWIDE TRADE
Corporate video eibmarkt®

99% CUSTOMER SATISFACTION
> 500,000 customers worldwide

DHL TRACK & TRACE
Shipment tracking

COMPLAINTS HANDLING
Obliging and 100% safely

25 YEARS OF EXPERIENCE
In worldwide mail order

* Note on delivery time: Day = Monday to Friday, no public holiday in Bavaria or Saxony. Goods are also delivered on Saturdays (DHL).

** Payment methods may vary from country to country. All prices plus shipping and excluding customs duties or other additional costs (import sales tax) for deliveries outside the EU.

*** Savings compared to RRP = the manufacturer's recommended retail price. RRP is the price recommended to retailers by the manufacturer, importer or wholesaler as a resale price to the customer. The RRP is also referred to as the list price and is defined as the highest possible price that a buyer would pay for a specific product before any discounts (Source of gross list prices: Germany).
