Universal LED 1712DE series touch dimmer, composition of the basic element, push button operation, phase control dimming, phase cut dimming, universal load type, extension input, light value memory, can be used with a button, can be used with a motion detector, can be used with a presence detector, can be used with a time switch/timer, flush-mounted installation type, claw/ Screw fastening, other material quality, halogen-free, nominal voltage 230... 230V, frequency 50... 60Hz, nominal power 20... 210VA, connection type screw terminal, core cross-section 0.5... 4mm<sup>2</sup>, universal LED series touch dimmer, insert , with extension input, rated voltage: AC 230 V ~, mains frequency: 50/60 Hz, standby power (depending on the attachment): approx. 0.1 to 0.5 W, power loss: approx. 4 W, device works according to the phase - or trailing edge principle, device can be operated without a neutral conductor, automatic or manual setting of the dimming principle suitable for the load, LED display of the set B Operating mode, switch on by soft start that protects the lamp, switch on with the last brightness setting or saved switch-on brightness, switch-on brightness can be saved permanently, minimum brightness can be saved permanently, electronic short-circuit protection with permanent switch-off after 7 seconds at the latest, electronic over-temperature protection, test mode for functional testing, two independent outputs for two lighting groups, connected load per Output at 25 °C: incandescent lamps: 20 to 210 W, HV halogen lamps: 20 to 210 W, HV LED lamps dimmable: typically 3 to 50 W, compact fluorescent lamps dimmable: typically 3 to 50 W, electronic transformers: 20 to 210 W, electronic transformers with LV-LED 20 to 50 W, inductive transformers: 20 to 210 VA, inductive transformers with LV-LED 20 to 50 VA, when operating in LED trailing edge operating mode: connected load for HV-LED lamps: typically 3 up to 100 W, electronic transformers with LV-LED: typically 20 to 100 W, ohmic-capacitive: 20 to 210 W, capacitive v-inductive: not permitted, ohmic-inductive: 20 to 210 VA, ohmic and HV-LED: typically 3 to 50 W, ohmic and compact fluorescent lamps: typically 3 to 500 W, asymmetrical load distribution possible, power expansion possible through power boosters, total length of load line: maximum 100 m, connection: screw terminals, 1 x 0.5 to 4 mm<sup>2</sup> or 2 x 0.5 to 2.5 mm<sup>2</sup> (solid and flexible without ferrule) and 1 x 0.5 to 4 mm<sup>2</sup> or 2 x 0.5 to 1.5 mm<sup>2</sup> (finely stranded with ferrule), total length of extension line: maximum 100 m. Number of extensions: unlimited (extension insert 2-wire item no.: 1720 NE and...

### YOUR ADVANTAGES

**WORLDWIDE TRADE**  
Corporate video eibmarkt®

**99% CUSTOMER SATISFACTION**  
> 500,000 customers worldwide

**DHL TRACK & TRACE**  
Shipment tracking

**COMPLAINTS HANDLING**  
Obliging and 100% safely

**25 YEARS OF EXPERIENCE**  
In worldwide mail order

**ORDER LIVE CHAT**  
With order history

**SHORT DELIVERY TIME**  
Warehousing

**REFUND**  
Within 14 days

**DATA PROTECTION**  
Guarantee

\* Note on delivery time: Day = Monday to Friday, no public holiday in Bavaria or Saxony. Goods are also delivered on Saturdays (DHL).

\*\* Payment methods may vary from country to country. All prices plus shipping and excluding customs duties or other additional costs (import sales tax) for deliveries outside the EU.

\*\*\* Savings compared to RRP = the manufacturer's recommended retail price. RRP is the price recommended to retailers by the manufacturer, importer or wholesaler as a resale price to the customer. The RRP is also referred to as the list price and is defined as the highest possible price that a buyer would pay for a specific product before any discounts (Source of gross list prices: Germany).
