Valve drive controller 4-fold REG VC/S4.1.1 bus system KNX, other bus systems without, mounting type REG, width in modular units 8, with bus coupling, control variable constant, control variable switching, valve protection function, number of binary inputs 12, max. switching current (resistive load) 0.3A, number of outputs 4, max. output current 0.3A, switching voltage 230 ... 230V, degree of protection (IP) IP20, min. depth of the device box 64.5mm, for controlling heating and cooling applications in the room, such as eg radiators, underfloor heating or a chilled ceiling. The device has 4 channels, each of which can be used to independently control a heating or cooling application. Each channel has an electronic valve output for controlling a thermoelectric valve drive, as well as 3 inputs for recording and monitoring the room condition (can be used for window contact, dew point sensor, level sensor or temperature sensor). It is also possible to connect an analogue room control unit (SAR/A) to the inputs of the device. To regulate the room temperature, the device has an integrated room temperature controller, which can be used directly to control the outputs of the device. The ABB i-bus tool can be used for extended diagnostic functions and improved commissioning.

* Note on delivery time: Day = Monday to Friday, no public holiday in Bavaria or Saxony. Goods are also delivered on Saturdays (DHL).

** Payment methods may vary from country to country. All prices plus shipping and excluding customs duties or other additional costs (import sales tax) for deliveries outside the EU.

*** Savings compared to RRP = the manufacturer's recommended retail price. RRP is the price recommended to retailers by the manufacturer, importer or wholesaler as a resale price to the customer. The RRP is also referred to as the list price and is defined as the highest possible price that a buyer would pay for a specific product before any discounts (Source of gross list prices: Germany).
