Double bellows compensator DN 25 KOMP 25 (VE2) Other version, hose length 0.175m, double bellows rubber compensator for structure-borne noise decoupling of heat pump and heating system. Absorbs vibrations and movements caused by pumps, compressors, fittings, etc., reduces noise and equalizes stresses (axial and lateral differences) from assembly inaccuracies. Bellows made of EPDM, IG connections made of malleable cast iron, operating temperature -10°C to 110°C. Scope of delivery 2 pieces. Compression 22 mm (stroke 10 / -12), extension 6 mm, lateral movement 22 mm, angular stroke 45°. Horizontal installation, as close as possible to the heat pump, is recommended!

* Note on delivery time: Day = Monday to Friday, no public holiday in Bavaria or Saxony. Goods are also delivered on Saturdays (DHL).

** Payment methods may vary from country to country. All prices plus shipping and excluding customs duties or other additional costs (import sales tax) for deliveries outside the EU.

*** Savings compared to RRP = the manufacturer's recommended retail price. RRP is the price recommended to retailers by the manufacturer, importer or wholesaler as a resale price to the customer. The RRP is also referred to as the list price and is defined as the highest possible price that a buyer would pay for a specific product before any discounts (Source of gross list prices: Germany).
