Dowel S 6 Design expansion dowel, drill hole diameter 6mm, suitable for screw diameter 4 ... 4mm, drill hole depth 40mm, length 30mm, material plastic, material quality polyamide (PA), suitable for hexagon wood screw. The fischer expansion dowel S is the original and has been the standard for decades Classics tried and tested millions of times. The plastic anchor is made from 100% high-quality nylon. This makes the anchor particularly robust during installation and guarantees lasting safety. Since the anchor only expands in two directions, the expansion forces can be introduced parallel to the edge of the building material by turning the anchor. This prevents the building material from flaking off when it is fastened close to the edge. Wood or chipboard screws can be used to fasten the object. The fischer expansion anchor S is ideal for fixings in concrete and masonry made of solid stone.

* Note on delivery time: Day = Monday to Friday, no public holiday in Bavaria or Saxony. Goods are also delivered on Saturdays (DHL).

** Payment methods may vary from country to country. All prices plus shipping and excluding customs duties or other additional costs (import sales tax) for deliveries outside the EU.

*** Savings compared to RRP = the manufacturer's recommended retail price. RRP is the price recommended to retailers by the manufacturer, importer or wholesaler as a resale price to the customer. The RRP is also referred to as the list price and is defined as the highest possible price that a buyer would pay for a specific product before any discounts (Source of gross list prices: Germany).
