Motor drive MDS-4SW A240 Version of the switching drive Solenoid drive, Rated control supply voltage U_s at AC 50 Hz 230 ... 230V, Rated control supply voltage U_s at AC 50 Hz 230 ... 230V, Type of voltage for actuation AC, Electrical operation: By pressing the ON button, via a coil triggers the release mechanism and the circuit breaker is closed by the stored energy mechanism. When the OFF button is pressed, a relay starts the motor, which opens (resets) the circuit breaker and charges the spring again. Manual operation: By pressing the mechanical ON button (on the front of the motor), the unlocking mechanism is released and the circuit breaker is closed by the stored energy mechanism. The drive can be switched off (reset) by actuating the spring. The spring energy store is charged again via the hand lever, which is moved back and forth about 10 times.
